Asterisks (\*) indicates that a coding variable may be used in place of the asterisks to indicate a color or feature that does not affect washer efficiency. The California Urban Water Conservation Council and participating water supply agencies do not guarantee materials or workmanship; acceptance of such is the customer's responsibility. WF = Water Factor, number of gallons needed for each cubic foot of laundry. A lower number (water factor) indicates lower consumption and more efficient use of water. Information compiled from CEE's Residential Clothes Washer Qualifying Product List and Energy Star's Residential Qualified Clothes Washer Product List.
