

## **Cedar Hill Wastewater Rate Update**

On November 14, 2008, the Missouri Public Service Commission (PSC) approved a change in wastewater rates for Cedar Hill customers. The new rates took effect on November 28, 2008. The typical residential customer in Cedar Hill will pay approximately \$10.29 more per month for wastewater service under the new rates. That customer will pay approximately \$33.81 per month for wastewater service.

When Missouri American Water acquired the Cedar Hill wastewater system in November 2004, the company began making significant improvements to the system, improving the quality of water being discharged to the Big River. Missouri American Water has continued to improve the Cedar Hill system. From June 2007 to September 2008, approximately \$33,560 has been invested in improvements to the wastewater lagoon and treatment system.
