

WATER CONSERVATION WHEEL

Spin the wheel and learn how much you can save by making a few small changes indoors and out. Conserving water is important during any time of year, and taking special care to be efficient during springtime can make a big difference.

KNOW THE SEVEN STAGES OF WATER CONSERVATION

The Monterey Peninsula Water Management District (MPWMD) has a Water Conservation and Standby Rationing Plan. It is designed to meet environmental restrictions, prolong water supplies during times of drought and help reduce water use immediately in an emergency situation.

STAGE 1

Outdoor watering schedule is in effect.

STAGE 2

High water users and large landscape irrigators must stay within a water budget.

STAGE 3

Fees for excessive water use are implemented.

STAGE 4

Water users are asked to reduce water use by 15 percent.

STAGE 5

Water use is rationed. A 20 percent system-wide reduction in water use is required.

STAGE 6

Water use is rationed. A 35 percent system-wide reduction in water use is required.

STAGE 7

“Extreme” water supply conditions are declared. A 50 percent system-wide reduction is required.

OUTDOOR WATERING SCHEDULE

Odd-numbered and Carmel south and west addresses

Even-numbered and Carmel north and east addresses

Saturdays & Wednesdays

Sundays & Thursdays

Restrictions implemented in previous stages may remain in force should the next stage be reached. To learn more about the seven stages of water conservation, watering schedules, and how you can make a difference, call **(888) 237-1333**, **(831) 658-5601** or visit one of the following resources: www.montereywaterfacts.com • www.waterawareness.org • www.mpwmd.dst.ca.us
