Resolution No. _____

Application for Special Connection

This application made in triplicate this _____ day of _____ 19 _____,
 by _____ (a corporation of the State of _____)
 hereinafter called the "Applicant", to the _____
 (a corporation of the State of _____), doing business in the _____
 _____, hereinafter called the "Water Company."

The Applicant, upon the terms and conditions hereinafter set forth, hereby applies to the Water Company for a
 _____ inch service pipe connected to the street main of the Water Company
 on _____ Street between _____ Street and
 _____ Street in the _____ of _____
 for the purpose of attaching said service pipe the following fixtures and openings:

all of which fixtures and openings to be located within or upon the premises of the Applicant abutting the street on which the said main of the Water Company is located.

In consideration for which the Applicant agrees to be bound by all the terms and conditions of this application, and to pay the Water Company for service at the schedule of rates in effect from time to time during the rendition of such service.

The further terms and conditions upon which this application may be accepted by the Water Company are as follows:

First: That the fire protection service and connection shall be installed by the Utility or under the Utility's direction. Cost of the entire fire protection installation shall be paid for by the applicant. Such costs shall not be subject to refund.

Second: That all facilities paid for by the applicant, excluding the connection at the main and any service pipe located in a public right-of-way, shall be the sole property of the applicant. The Utility and its duly authorized agents shall have the right to ingress to and egress from the premises for all purposes of making such inspections as it may deem necessary, and it shall have the right to attach any testing device or use any means which it may elect to ascertain the condition of the pipe and appurtenances and the use made of same.

Third: That a double check valve assembly or a reduced pressure principal backflow prevention device and related valves, fitting, etc., may be required on said service at such location as may be determined by the Water Company. Such devices and appurtenances shall be constructed by Utility or under the Utility's direction, at the cost of the applicant. Such cost shall not be subject to refund. The expense of maintaining all facilities which are the sole property of the applicant (including the vault, meter, detector type check valve, backflow device and appurtenances) shall be paid for by the applicant.

Fourth: That the service control valve shall be under the control of the Water Company, except during times of fire, when it shall be under the control of the Chief of the Fire Department of said City or Fire District and the Applicant agrees to obtain approval of said Chief of this application.

Fifth: That all fixtures and openings (other than control valves) shall be kept closed and sealed, and not open or used except during times of fire. Upon extinguishment of each fire, the Applicant shall immediately notify the Water Company, so that said fixtures and openings can again be closed and sealed.

Sixth: That the extent of the rights of the Applicant under this application is to receive, but only at times of fire on said premises, such supply of water as shall be available and no other or greater. That the Applicant agrees the Water Company shall not be considered in any manner an insurer of property or persons, or to have undertaken to extinguish fire or to protect any persons or property against loss or damage by fire, or otherwise, and that it shall be free and exempt from any and all claims for damages on account of any injury to property or persons by reason of fire, water, failure to supply water or pressure, or for any other cause whatsoever.

Seventh: That this application does not contemplate uses of fixtures other than herein stated. If a supply of water for use other than extinguishment of fire is desired by the applicant, then same shall be taken only through a service pipe separately connected with the street main of the Water Company and not connected directly or indirectly with the service pipe contemplated by this application. Additionally, building sprinkler systems and on-site fire hydrants shall be served through service pipes separately connected to the street main of the Water Company. The systems shall not be interconnected in any way either in the street or on the applicant's property. Any waste of water or use of water for purposes other than the extinguishment of fire through this connection shall be deemed a violation of the terms and conditions of this application and the rules and regulations of the Water Company.

Eighth: That the Applicant shall furnish, attach and make a part hereof, an accurate sketch showing the pipes, valves, hydrants, tank, openings and appurtenances contemplated in this application. Such sketch must also show any other water supply system and pipe lines and appurtenances which may exist on the premises. There shall be no connection between such other supply and pipes connected to the Water Company's mains.

Ninth: That the rights and obligations of the Applicant hereunder shall be further subject at all times to the rates, rules and regulations of the Water Company that now exist or which may hereafter be adopted.

Tenth: That the Applicant agrees to obtain in advance the approval of the Water Company for any change, alteration, addition or deduction contemplated in the fixtures, openings and uses herein specified.

Eleventh: That upon acceptance by the Water Company and the completion of the service connection herein contemplated, this application shall be in force as a contract and shall continue as such until cancelled by written notice fifteen days in advance given by the Applicant to the Water Company.

Twelfth: That the Water Company has the right to discontinue or disconnect said service pipe and terminate this application, upon written notice given fifteen days in advance by the Water Company to the Applicant, for failure to pay any bill when due, or for any violation of any of the terms and conditions of this application, or for any violation of its rules, and in emergencies also has the right without notice to shut off all or any part of its facilities and discontinue the service when deemed necessary by the Water Company for the purpose of making any repairs, alterations, additions, or to prevent possible contamination through cross-connected facilities of the Applicant or to prevent negligent or willful waste of water through the facilities of the Applicant.

Thirteenth: The acceptance of this application by the Water Company must be executed by its Manager and President or Vice-President before same becomes effective as a contract.

IN WITNESS WHEREOF the Applicant, hereunto signed _____, has executed
(Names)
this Agreement on the day and year first above written.
