Where Does My Water Come From?

The Las Posas Water System is served entirely by treated surface water purchased from the Calleguas Municipal Water District. Calleguas Municipal Water District is an authorized wholesaler of treated surface water received from the Metropolitan Water District of Southern California's Jensen Treatment Plant. The source of the raw surface water is the Sacramento Delta Aqueduct (also known as the State Water Project). Drinking water treatment technologies used for this imported water include conventional treatment (Coagulation, Filtration, and disinfection).
