# Water Rate Information

## Monterey Peninsula

To learn more about how water works for you,  
or if you have any questions, please  
visit us online or call the number below.

**web: [www.calamwater.com](http://www.calamwater.com)**  
**phone: 888.422.5261**

*Printed on recycled paper; each ton of recycled  
paper saves 7,000 gallons of water.*

This brochure explains our water rates and  
shows how a sample bill is calculated.

We will mail you a brochure like this one once  
a year or whenever there is a rate increase.

Please see inside for details.

An American Water Works Company

# Water Rate Information

You pay us a service charge (a fee for being connected to the system) that stays the same no matter how much water you use. You also pay us a quantity rate or a charge for each cubic foot (one cubic foot is about 7 1/2 gallons) of water you use. Reducing your water use will save you money by reducing the quantity charge that you pay. However, using less water will not save you money on the service charge because it stays the same no matter how much water you use. Here are the rates we now charge:

---

## Service Charge

If your meter is this size:	You pay this much per month:
5/8 inch by 3/4 inch (most homes have these)	\$6.37
3/4 inch	\$9.55
1 inch	\$15.91
1 1/2 inch	\$31.83
2 inch	\$50.92

(If your meter is larger than 2 inches, call us for the service charge)

---

## Quantity Rate

The first 800 cubic feet (or about 6000 gallons) of water that you use in a month costs \$1.91 per hundred cubic feet or about 2.5 cents per ten gallons.

If you use more than 800 cubic feet, but less than 1600 cubic feet, each hundred cubic feet you buy costs you \$2.55 or about 3.4 cents per ten gallons.

If you use more than 1600 cubic feet, but less than 3200 cubic feet, each hundred cubic feet you buy costs you \$5.11 or about 6.8 cents per ten gallons.

If you use more than 3200 cubic feet, each hundred cubic feet you buy costs you \$10.22 or about \$1.36 per ten gallons.

---

## For Example...

Let's say that you use 1000 cubic feet (or about 7500 gallons) of water this month and have the smallest (.625 x .75 inch) meter. How much is your bill?

The service charge is \$6.37.

You used 800 cubic feet. The first 800 cubic feet costs \$1.91. The charge for the quantity used is 8 x \$1.91 or \$15.28.

There are 200 cubic feet left to be paid for. The price for them is \$2.55 for each hundred cubic feet. The charge is 2 x \$2.55 = \$5.10.

Your total bill for this example is \$6.37 + \$15.28 + \$5.10 = \$26.75.

Note: The quantity rates pertain to those customers located in the gravity zones. Customers who are located in higher elevations require lift zones surcharges.
