1. Confirm the purpose of the meeting or site visit is mission-critical.
   - Can site visit or meeting be delayed, held virtually, or physically outside the AW facility?
   - Are there other options to gather or relay information?
   - Get approval for the meeting by your immediate supervisor or higher-level manager (approval must come from an engineering manager level or higher).

2. Get approval from local operations to visit the facility (following approval by engineering manager).
   - Make sure local operations know the date / time, nature and purpose of the visit and who will be attending.
   - Discuss options available through on-site resources or other means to eliminate the need for the engineering visit.
   - Get approval from the facility superintendent or other senior operations personnel.

3. Limit contractors / consultants and make sure they follow proper protocols.
   - Review the meeting plan with any outside contractors and confirm there are no unneeded participants.
   - As the host, make sure all contractors follow the Contractor / Engineering Consultant Travel & Working Guidance.

4. Conduct self-screening based on these six key questions:
   - Has anyone who you have been in close proximity within the last 14 days currently ill or experiencing flu-like symptoms?
   - Have you or anyone in your home been diagnosed with or presumed to have COVID-19 within the past 30 days?
   - Are you or is anyone in your home currently ill or experiencing flu-like symptoms?
   - Has anyone in your home been self-quarantined or self-monitoring for COVID-19 within the past 14 days?
   - Have you or anyone in your home recovered from a COVID-19 illness within the last 72 hours? Recovery is defined as resolution of fever without the use of fever-reducing medications and improvement in respiratory symptoms.
   - Have you or anyone in your home traveled internationally or been on a cruise within the past 14 days?
   - If the answer is “yes,” to any question, do not enter the facility.

5. Minimize contact at the facility.
   - Have a plan to get in and get out.
   - Only visit those areas of the facility that are absolutely critical to the purpose of your visit.
   - Avoid contact with staff at the facility as much as possible.
   - Stay out of the control room(s).
   - Follow all applicable guidance regarding face coverings, social distancing, hand washing, etc.

6. Prepare a post-visit report and submit to your immediate supervisor.
   - Indicate the date and start / end times that you were on-site.
   - Describe all locations you visited within the facility (exclude areas that you simply passed through).
   - Provide a list of anyone who was with you, including their company name and contact information.
   - Provide a list of any AW employees that you were in close contact with during your site visit.
